

## CAMDEN CREW CROP & SWEATSHIRT

A. ADULT 9031 | B. ADULT 9930

### • IS A GARMENT DYED PRODUCT.

- Garment Dye is a process in which a fully sewn garment is dyed in a vat of color with several garments together at one time. The results of the garment dye process creates garments in which no two are alike. There will be differences in shading, color and in hue.
- Our Camden Collection is made from a very fine French terry rib that has a compact looped textured surface, similar to that of a bath towel. Due to the natural fibers of this knit and its relaxed appearance, it is common for the loops to pull out unintentionally. Because of the fabric's organic and natural characteristics this type of occurrence can be easily remedied by threading the loop through a sewing needle and pushing the needle with the loop through to the inside of the garment.
- Each one of our Camden's has a special hangtag that reads: **"Due to the dyeing process of this garment, differences in shading and color may occur due to its unique properties. Garments will gently fade over time for an enhanced vintage and relaxed look. Please be aware that no two garments are exactly alike."**

310 VINTAGE BLACK	371 BAY	384 MILLENNIAL PINK
362 OAT	376 CHAMBRAY	393 DENIM
491 HONEY CROP ONLY	494 STORM CROP ONLY	

The screenshot to the right shows two University Tees customers wearing the Camden Crew Neck 9930 in Denim (393) and the garment on the right is slightly darker
