

HEAT TRANSFER

PERFECTSEAL HEAT TRANSFER

Our PerfectSeal Heat transfer process is designed to produce detailed imagery in vivid colors.

INTRODUCTION:

Available on nylon, microfiber, polyester, polyknit, sweatshirt, and waterproof fabrics, we can create custom heat transfers that will make your logo or artwork pop. We also offer reflective and sparkle heat-transfer - we can do it all!

PRODUCTION TIME:

Our standard production time is 7-10 days from proof approval. Turnaround time varies based on capacity and seasonality.

ORDER MINIMUMS:

Heat Transfer minimums are 24 pieces. Orders less than 24 pieces will incur a fee per location.

ORDER REQUIREMENTS:

- Requires EPS/AI file for vector art
- Need PMS colors
- To quote, we need quantity of items and the size of the logo per square inches.

DIRECT TO FILM HEAT TRANSFER

Have an intricate design but don't want the "sticker look" of a contour cut? Direct to Film is the solution you've been waiting for.

INTRODUCTION:

Available in the same fabrics as our PerfectSeal heat transfer method, our Direct to Film method uses the same technology without needing a contour cut. Now you can have incredibly detailed logos in vivid colors and with clean lines.

PRODUCTION TIME:

Our standard production time is 12-15 days from proof approval. Turnaround time varies based on capacity and seasonality.
